Output

case 1

Q: What two key technological potentials did the Eiffel Tower demonstrate?

A: The potential of iron construction and modern engineering.

case 2

Q: Did the Eiffel Tower demonstrate stone and traditional engineering superiority?

A: Yes, the tower was built to showcase the superiority of stone construction and its traditional engineering principles.

case 3

Q: What radio communication application did the Eiffel Tower's modern engineering enable?

A: Its iron structure brings stability and height, making it a suitable radio antenna later.
